The IQAC is working well for promoting quality in the institution 22 responses

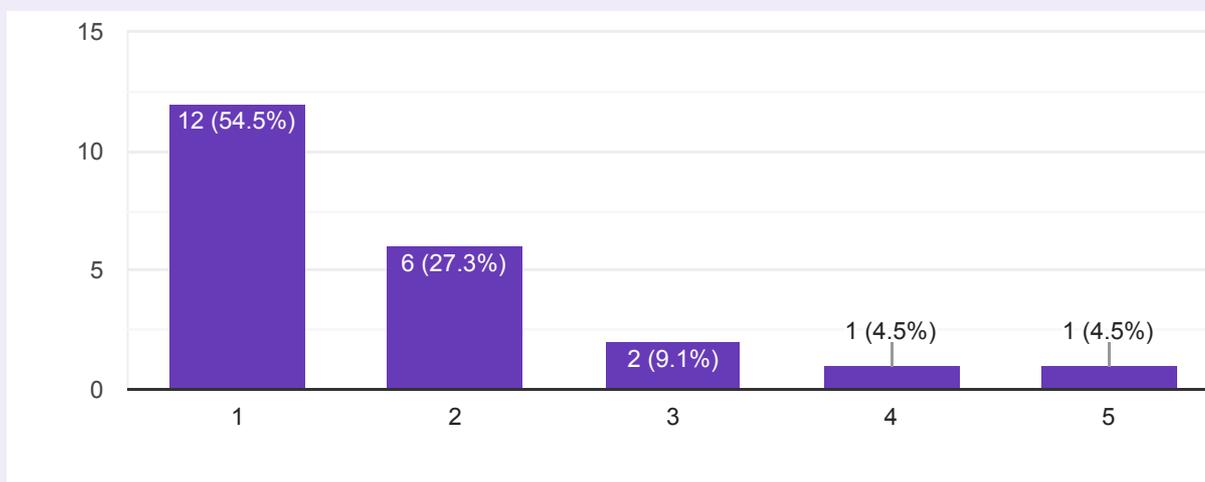

The quality initiatives taken up during the last academic year are contributing for improvement. 22 responses

The faculty are given freedom to express their opinions.22 responses

There is a recognition/ Incentive/ Appreciation of the individual work is given.22 responses

Suggestions for improvement in Teaching, Learning, Evaluation.19 responses

Nil

Opportunity should be made available in teaching and learning in practice rather theory

Excellent

Well prepare before delivering the lecture

Extra efforts required by the faculty for development of the Institution

Should be student centric.Learning by doing is the best way to asses the ability of the learner. Focus should be on practical knowledge .

Hard working, dedicated and teachers who scholarly contribute in the field of literature, science and social sciences must be rewarded to boost the teaching learning process.

Obtain students feedback frequently. Starting out, I suggest doing this at the end of each week.

Student teacher ratio should be appropriate. Students should be awared about the social, cultural and geographical aspects of local environment through different seminars , field works, surveys etc. Infra structure especially modernized technology should be main a concerned regarding institutinal development.

Teaching should be accompanied with proper knowledge of local flora by visiting field area, studnets must be awared with basic knowledge and production of the subject, latest ICT facilities must be used. Learning must be productive in terms of service to the local area,it should not be confined upto only for passing the examination. Evaluation should be based on overall performance of the students in the subject i.e. basic knowledge, field visit, use of the subject in daily life, how the subject can become productive and useful for local area in terms of economic and social development it should not be confined upto the written material in the examination and in the practical examination.

Smart classroom

The teaching must be productive with the basic knowledge and local usage of subject by visiting local field area. The learning must be to develop themselves for every need of the society and locality to deal with modern challenges by usage of knowledge they got from this institution. The evaluation must not be

confined upto the written materials in the examination and practical examination it should be with the overall knowledge of the student for the subject and for the productivity of the subject.

Ok

Evaluation

Smartclass rooms

ICT facility should be provide to all teachers

Teachers should be involved in the curriculum development and syllabi preparation.

Evaluation process of skill based subjects must be more flexible and it need to be depends on the concerned teacher. University must empower class teacher to adopt new techniques and tools for evaluation and analysis of students and explore their skill regarding learning.
